

CURVED WINDOWS, GUARDS AND COVERS

Eck Plastic Art's proprietary process means no tooling costs or tool marks!

Eck has developed a process for thermoforming high quality curved windows, guards and covers, allowing us to put a radius into sheet plastic without tooling. Properties such as color, rigidity, UV resistance, low temperature impact and heat distortion temperature can be cost-effectively optimized to add value to your part.

Plastic Arts

CHECK OUT THE ECK ADVANTAGE VS. TRADITIONAL DRAPE FORMING:

	ECK'S PROCESS	TRADITIONAL DRAPE FORMING
Tooling Cost To The Customer	None	Both a male and female mold
Tooling Build Time	None	Weeks if not months
Cost per Window	Same	Same
Surface Finish	Same as new sheet stock	Dependent on mold quality (Better finish equals higher dollars)
Screen Printing	Available	Available

Eck can also finish your part by:

- Cutting additional features into the window or guard on our 5 Axis Router
- Completing any associate assembly onto a frame or adding any fixture
