

# THE ECK ADVANTAGE

Quality is **Job 1** in Injection Molding

**How do you know your plastic parts have their intended material properties?**

Injection molders have to control many variables to insure parts have the correct molecular structure. In fact, good molders control every variable their machinery allows.

## **Eck Plastic Arts takes it much further:**

Eck requires an internal first piece inspection for both weight and critical dimensions on every job we run

Eck measures dew point of the resin being processed to prevent weak, brittle parts and voids not visible to the naked eye

Eck detects and removes all defects before parts are delivered to you

Count on Eck Plastic Arts for the highest quality injected molded parts.
